Tree guardians for life

In Colombia, PWRDF partner ILSA recognizes that tree preservation is integral to the fragile Páramos, a moorland ecosystem in the mountains that is the source of 70% of the country's fresh water. ILSA works with women to preserve seeds that are at risk of disappearing, which not only threatens the environment but also has a devastating impact on food security.

Adelina Cordoba leads a group of women while (inset) Emilse Ravelo gets set to plant a seedling.

LET US BREAK GROUND TOGETHER

In this year's World of Gifts campaign, PWRDF celebrates its many partners who are planting trees. In 2022, the Anglican Alliance launched the Communion Forest, a world-wide campaign to engage people on the importance of caring for creation through greening and reforestation initiatives. As a founding member of the Anglican Alliance, PWRDF is encouraging parishes and dioceses to join in. In Ottawa, the PWRDF working group launched Branches of Hope. The Diocese of Ottawa provided tree seedlings to be planted locally while the campaign raised $5,000 to fund the planting and maintenance of 1,250 local tree seedlings for PWRDF partner St. Jude Family Projects in Uganda. Learn more at **pwrdf.org/communionforest**.

Water access and conservation

How much can your parish or diocese raise for a borehole?

A time to drill

In Zimbabwe, borehole wells provide clean water to the community. A narrow shaft is drilled 60 to 80 metres into the water table. The water flows into a 10,000-litre tank, then into pipes that supply water to households for domestic use, or for livestock as pictured here. Solar panels provide power to pump the water. One borehole costs $21,000, but you can help!

6. YOUR GIFT of $100 will support TSURO Trust as it brings this important infrastructure to the community. With match = 2x support*

On tap for the community
